

Casing:

Consult with OCI to insure the material availability of casing that will meet the specification required on your bid. Often the specifications are months even years old and the pipe markets are always changing. Alternate designs may need to be considered before you lock yourself into pipe size that is in short supply or not available in the quantities you will need to complete the contract.

Tooling:

Buying a new Drill – OCI will help you devise a tooling combination for a range of sizes that will be adaptable for current and future contracts. Tooling built with the knowledge of years of practical field proven concepts that will keep you in production longer with less down time issues.

Drill Rods, Can Rods, Stabilizers, Over the Hammer Stabilizers, Eccentric Hammers Systems, Casing Shoes,

Re-Tool:

Call us if you own a drill that requires re-tooling in order to install a different type or size of casing that your current tooling can handle. We can provide the all the tooling to convert your auger drill to large diameter DTH work.

Swivels:

We build and service a complete range of swivels for construction drilling including Grout, Duplex, Mud or Air Drilling and High Pressure types. Reverse Circulation Swivels for Construction drills. OCI offers quick turnaround of swivels for less downtime.
